

The Statistical Applications & Innovations Group (SAIG)

Data. Science. Decisions.

Serving Virginia Tech faculty and student researchers for over 70 years.

Sound Design

S

Whether you are working on social science or rocket science, we can create the study or experimental design to achieve your research objectives. We can maximize information, given your resources, by using principles of sound experimental design.

Appropriate Analytics

A

How do you demonstrate statistical significance? What do you do with non-normal data? Traditional modeling or machine learning? Text mining? Bayesian or frequentist? We can sort these issues out by collaborating on appropriate analytics.

Schedule a free collaboration session

SAIG offers 10 free hours of statistical collaboration services to faculty and student researchers from participating Virginia Tech Colleges. Virtual consultations available.

Intelligent Interpretation

I

So, you have statistical results and you are ready to publish or report to your sponsor. You ask: What is the proper way to communicate my conclusions? What visuals support my data analysis? We've got your back with intelligent interpretation.

Growth

G

Onward and upward with SAIG. Sound statistical design, appropriate analytics, and intelligent interpretation are key elements in producing your best proposals and publications. Partner with SAIG and the sky is the limit on your research growth.
